### Product Overview

Cadmus's PXE210AT - PCI Express Gigabit Ethernet provides a pathway from legacy PCI/PCIe designs to higher performing PCIe-based designs. The Intel I210AT Gigabit Ethernet Controllers provides fully integrated Gigabit Ethernet Media Access Control (MAC) and Physical-Layer (PHY) capabilities that can be configured for either 1000 Mb/s or 10/100 Mb/s modes of operation. Each Controller provides MDI (Copper) standard IEEE 802.3 Ethernet interface for 1000BASE-T, 100BASE-TX, and 10BASE-T applications (802.3, 802.3u, and 802.3ab).
